

Hello and thank you for downloading the Growing Curious Minds printable calendar freebie!

I have made the printable as simple and easy as possible for busy parents as well as offering a black and white version should this be more economical for you.

There are a couple of options in how you decide to use the calendar printable – it can be laminated and attached to a refrigerator where magnets are used on the back of each smaller item (days/ months etc). Or you can use it with velcro sticky dots. Either way I recommend laminating all of the pages then trimming them.

I would love to hear any feedback you have on this printable and how it could be improved or updated in any way.

#### **Instructions:**

1. Print all pages -choosing either the color or black and white pages
2. Laminate all pages
3. Trim the days/ months/ letters
4. Attach either velcro sticky dots to each individual attachment or use magnet sheets with double sided tape (see the next note below for the letters & numbers).
5. For the letter of the day & number of the day as there are so many, I would create a little plastic pocket from a small piece of plastic sheet adhered with sticky tape so the letter/number can be slipped into the pocket each day (and avoid a lot of magnets or sticky dots!).
6. Place calendar in a place where your little person can see it easily each day and together you can update it in the morning.

Feel free to message me with your comments and feedback!

Thanks, Carly
